Responsible Organizations Management
For Sustainable Transitions

PARTNERS

The ROMST (Responsible Organizations' Management for Sustainable Transitions) project brings together a distinguished consortium of eight higher education institutions and one international professional association. Each partner contributes complementary academic expertise, regional perspectives, and professional networks, ensuring the development of a high-quality and innovative joint Master's programme aligned with the strategic priorities of the European Green Deal and the United Nations Sustainable Development Goals.

[ISM-IAE / UVSQ – France](#)

As project coordinator, ISM-IAE / UVSQ (Université Paris-Saclay) plays a central role in the academic and strategic design of the program. With recognized expertise in responsible management, sustainability, and social transitions, ISM-IAE / UVSQ has extensive experience in interdisciplinary research and international cooperation. It contributes strong competencies in ecological governance, ethical management, and public policy analysis, ensuring the academic coherence and European positioning of the future Master's programme.

European Marketing and Management Association (EUMMAS)

EUMMAS is an international association connecting academics, professionals, and institutions in the fields of marketing and management. It brings a strong focus on diversity, inclusion, professional certification, and international networking. As a thematic partner, EUMMAS enhances the project's outreach capacity, stakeholder engagement, and links between academia and business communities across Europe and beyond.

A Complementary and Strategic Consortium

Together, the ROMST partners combine expertise in responsible management, ecological transition, digital transformation, social innovation, finance, entrepreneurship, diversity, and governance. The consortium reflects a balanced geographical representation across EU and non-EU countries, reinforcing the European dimension while maintaining a strong global outlook.

Through this collaboration, the partners aim to design a holistic, ethical, and action-oriented Master's program capable of training a new generation of leaders equipped to manage the complex ecological, social, and digital transitions shaping contemporary organizations and societies.
